

SOLWEAR

**Your Crypto. On Your
Wrist.**

Secure crypto
payments should be
as easy as tapping
your wrist.

the **PROBLEM**

Hot wallets are fast, but risky.

Cold wallets are secure, but inconvenient.

Hardware wallets are safe, but not built for daily payments.

Meet **SOLWEAR**

SolWear combines cold-wallet level security with the convenience of a wearable payment device.

Designed for fast Solana payments, offline transaction signing, and real-world crypto usage - without sacrificing privacy or control.

how it works?

The phone prepares the transaction.
SolWear shows what is being signed.
The user confirms on the device.
The phone broadcasts the signed transaction.
The private key never leaves SolWear.

the **SECURITY**

No internet connection.

No remote access.

No private key on the phone.

Offline signing only.

Own unique secure algorithms.

Full transaction preview before approval.

competitors comparison

Feature	Phantom	Ledger	Unruggable	SolWear
Daily payments		-	-	
Key stays offline	-		+/-	
Wearable UX	-	-	-	
Duress protection	-	-	-	
Anti-scam signing	+/-	+/-	+	

target ***Audience***

For people who actually use crypto daily.

Solana users

Builders and event attendees

DeFi and NFT users

Privacy-focused users

People who want self-custody without carrying a USB wallet

business ***MODEL***

DEVICE SALES

Who pays: end users and self-custody Solana adopters

Price: \$99 MSRP per device

Margin: 40-45% pilot; 55%+ target at scale

EVENT / MERCHANT KITS

Who pays: organizers, merchants and communities

Price: \$250 kit + \$3-5 band + \$49/mo

Use case: payments, access control and loyalty

PREMIUM SECURITY

Who pays: power users who need more than basic signing

Price: \$4.99/mo or \$39/yr

Value: scam alerts, decoded tx, limits, duress controls

SDK / API +

INTEGRATIONS

Who pays: wallets, dApps and payment partners

Price: \$500-1,500/mo + setup fee

Value: POS SDK, white-label and merchant integrations

traction & *roadMAP*

BUILT TODAY

Core product milestones

Working prototype completed
End-to-end Solana transaction signing
NFC / Blinks payment flow in place
Wallet generation and import implemented
Human-readable approval screen on device
Offline signing: the key never leaves SolWear

NEXT MILESTONES

0–3 months
